

Assignment -1

Create a repository on your Azure account.

1. In the upper-right corner of any page, use the drop-down menu, and select New repository.
2. Type a short, memorable name for your repository. ...
3. Optionally, add a description of your repository. ...
4. Choose a repository visibility. ...
5. Select Initialize this repository with a README.
6. Click Create repository.

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner *

 daphnecrossbrowser ▾

Repository name *

selenium-azure-pipelines ✓

Great repository names are short and memorable. Need inspiration? How about [miniature-parakeet?](#)

Description (optional)

☒ Public

Anyone on the internet can see this repository. You choose who can commit.

☐ Private

You choose who can see and commit to this repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

☒ Add a README file

This is where you can write a long description for your project. [Learn more.](#)

☐ Add .gitignore

Choose which files not to track from a list of templates. [Learn more.](#)

☐ Choose a license

A license tells others what they can and can't do with your code. [Learn more.](#)

This will set  main as the default branch. Change the default name in your [settings](#).

Create repository
